## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-4, 13 and 19-24 are, drawn to a method for preparing an emulsion formulation comprising oil bodies and thioredoxin or thioredoxin reductase and products comprising said formulation, classified in class 424, subclass 401.
  - II. Claims 5-12, drawn to a method for preparing an emulsion formulation comprising oil bodies associated with thioredoxin or thioredoxin reductase, classified in class 424, subclass 94.4.
  - III. Claims 14-18, drawn to a method for preparing an emulsion formulation comprising oil bodies containing thioredoxin or thioredoxin reductase, classified in class 424, subclass 94.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II or III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together and they have different modes of operation, i.e. the oil bodies of Claim 1 and those dependent thereon are mixed with thioredoxin or thioredoxin reductase; the oil bodies of Claim 5 are associated with thioredoxin or thioredoxin reductase through an oil body targeting protein; and the oil bodies of Claim 14 contain thioredoxin or thioredoxin reductase.

Art Unit: 1616

3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I and III, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. Election of species should be required prior to a search on the merits in all applications containing both species claims and generic or Markush claims. (MPEP 808.01(a))
6. Claim 13 is generic to a plurality of disclosed patentably distinct species comprising:
  - (a) a product capable of treating oxidative stress in a target;
  - (b) a product capable of chemically reducing a target;
  - (c) a food product;
  - (d) a personal care product; and
  - (e) a pharmaceutical product,which require a burdensome classification, and/or bibliographic, manual and computer search.

Accordingly, if Group I is elected, the Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

To be complete, a response to the election of species requirement should include a proper election along with a listing of all claims readable thereon, including any claims subsequently added. MPEP 809.02(a).

Art Unit: 1616

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marina Lamm whose telephone number is (703) 306-4541.
